DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Howard M. Cohn on May 29, 2007.

The application has been amended as follows:

In claim 41, line 6, delete the phrase "a data stream;" has been replaced with ---a data stream; and---

In claim 41, line 7, delete the phrase "a modulation index" has been replaced with ---providing a modulation index---

Allowable Subject Matter

Claims 24-26, 28-29, 31-32 and 37-42 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding dependent claims 24 and 31, the prior arts fail to teach "a sync delay circuit for delaying the system clock signal in order to synchronize the system click signal with the data stream", as cited in the claim.

Regarding independent claim 37, the prior arts fail to teach “the phase-shift control signal uses a system clock signal having half the frequency of the RF signal received by the antenna system; and the data stream is a signal clocked at a fraction of the frequency of the RF signal received by the antenna system”, as cited in the claim.

Regarding dependent claim 39, the prior arts fail to teach “optimizing RF signal modulation performance by utilizing a modulation index having a magnitude which is adjusted according to programmed trim settings stored in the transponder”, as cited in the claim.

Regarding dependent claim 41, the prior arts fail to teach “ a modulation index having a magnitude which is adjusted dynamically in proportion to a power of the RF signal received by the antenna system”, as cited in the claim.

Regarding dependent claim 42, the prior arts fail to teach “a modulation index having a magnitude which is adjusted dynamically in proportion to a power of the RF signal received by the antenna system”, as cited in the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tu Nguyen whose telephone number is 571-272-7883.
